KUDA Shaders Mod 1.14.4/1.12.2 (The Whole Look in Minecraft)

KUDA Shaders Mod 1.14.4/1.12.2 is a shaderpack made for the Minecraft Shaders Mod. This shaderpack will change completely the whole look in Minecraft. KUDA Shaders adds basically shadows, new lightning system, godrays and other effects.

This shader pack is among the Top 3 concerning popularity. Unlike other realistic shader pack, this one is much faster and customizable, which speaks for itself. The effects are not overwhelming, but nice and decent.

The sun shines nice and calm over the landscape and reflects at the water surface. Wonderful clouds are flying on the sky and disappear in the air.

Water effects are designed very detailed, making it even more realistic. Incredible Shadows are dropped into the water surface by the light effects.

GLSL Shaders Mod 1.12.2/1.11.2 for Minecraft.

GLSL Shaders mod 1.12.2/1.11.2 is a simple mod in Minecraft. It is for people unlike unrealistic and boring light effects and flat shadow effect in Minecraft; this mod will be a perfect one to install in the game.

GLSL does not only change the light effect more realistic and shadow effect reaching more to the light and objects but also be easy to install and integrate many different mods. You cannot understand how the integration between wonderful mods except that you can master in modding. Many similar mods have met some difficulties in interaction; therefore, this feature is one plus point to GLSL Shaders mod.

However, before using GLSL Shaders, you need to know one important point: GLSL Shaders requires your computer system with high quality. Mod users need to have one strong Graphics Card to render textures and light effect when Shaders are activated in either square-shaped or simple Minecraft display. GLSL Shaders mod requires Forge Mod Loader and Minecraft 1.9.4, 1.10.2, 1.11.2, 1.12.

GLSL Shaders have been integrated into Optifine HD, you should download Optifine instead.

GLSL Shaders Mod.

The mod will allow you to install shaders for Minecraft game. Shaders are “scripts” for a video card, allowing you to add various effects to the game, for example, change lighting, texture mapping, reflection and refraction.

Shaders can be downloaded here.

GLSL Shaders Mod only adds support for shaders, shaders themselves need to be downloaded separately.

Mod Showcase:

Download GLSL Shaders:

For 1.8.9 and Higher All GLSL Shaders Features Now Available in OptiFine.

## GLSL Shaders Mod 1.17/1.16.5 (Colorful World of Minecraft)

GLSL Shaders Mod 1.17/1.16.5 – excellent and one of the highest quality shaders on Minecraft 1.17/1.16.5/1.15.2, after installing them the game will seem to you a completely different side, just look at this realistic fauna, the sky looks like a real along with animated water, as well as this mod adds a beautiful light effect to the game.

What's interesting?

Now all the details will be traced, there will be shadows, the normal look of the map. This is one of the most thoughtful shaderpacks, which will help make of the cubic game maximum realism. Shaderpack will support any resourcespacks, compatible with Minecraft Forge and Optifine HD, expected about 30 frames per second on an average computer.
